

Wild Apricot Cheat Sheet #9

Adding a QR Code to a Wild Apricot Membership

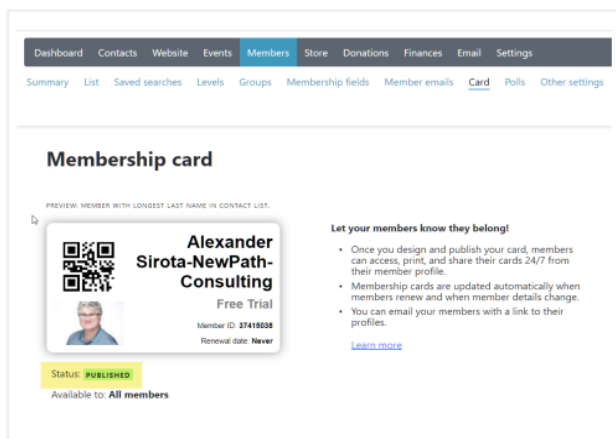

Scan your membership card with a phone camera!

1 While editing an image in the membership card, right click to inspect the image. This will open the DevTools of the code of the editor.

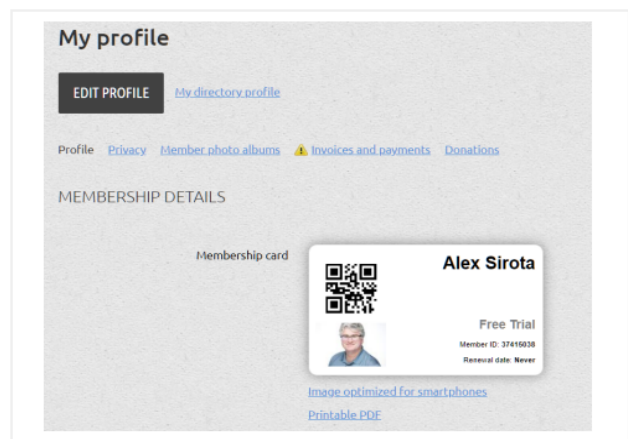

2 In DevTools, replace the IMG SRC with a QR Code API link. Use Wild Apricot macros after data=. This data is what is encoded into the QR Code dynamically. Hit return when done!

3 Save the card. You may need to refresh the page to see the changes including your original image replaced with the QR code.

When you publish the card all your members have a dynamic QR Code.

4 Each member's card now has a scannable QR code in the profile and Members mobile app!
